NOVEMBER/DECEMBER 2019

## THE PRODUCT GUIDE

Project Profile:  
CVLTVRA, Miami p64

### Stylish, Low-Maintenance LVT

Altro Lavencia provides a low-maintenance LVT option for front-of-house applications. Available in 45 films ranging from classic wood tones to coordinating stones, brights and modern organic looks, Lavencia is appropriate for high-traffic areas. It features a commercial-grade UV-cured urethane finish and a 28-mil wear layer. The square-edged construction prevents hidden contaminants from food and beverage spills, and its easy-to-clean surface requires no additional finish.

### Modern Mosaics

The Verge mosaic tile collection from Artaic presents a modern interpretation of traditional geometric patterns found in woven, beaded and block-printed textiles. Verge offers fully customizable field and feature tile pairing solutions that give design projects a consistent, cohesive aesthetic. The series' mural-like (feature) designs and simplistic (field) designs often have three or fewer colors and complement one another in adjacent applications or in spaces throughout a project. The collection designs are also available in natural stone, sintered glass and vitreous glass.
