### Eco Friendly Practices & Recycling Information

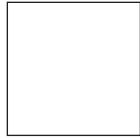

At Artaic, we prioritize eco-friendly practices in our mosaic production processes. Our sustainable approach involves pre-consumer recycling, where we collect and reuse waste materials generated within the manufacturing process before they reach the end consumer. By integrating these pre-consumer recycled materials, we effectively minimize waste, conserve resources, and reduce our environmental footprint, thus contributing to a more sustainable and circular manufacturing process.

Our glass mosaics are completely inert, ensuring no interaction with the atmosphere or release of volatile materials, further reflecting our commitment to eco-friendly practices in mosaic production.
